

Product no **AS15 3038****CFP | Cyan Fluorescence Protein (monoclonal, Clone GF28R)****Product information**

| | |
|-------------------------------|---|
| Immunogen | KLH-conjugated N-terminal peptide of Green Fluorescent Protein (GFP) from the jellyfish <i>Aequorea victoria</i> |
| Host | Mouse |
| Clonality | Monoclonal |
| Purity | Total IgG. Protein G purified in PBS, pH 7.4. Contains 0.052% sodium azide. |
| Format | Liquid |
| Quantity | 100 µg |
| Storage | Store at -20°C for up to 1 year, Make aliquots to avoid repeated freeze-thaw cycles. Please remember to spin the tubes briefly prior to opening them to avoid any losses that might occur from material adhering to the cap or sides of the tube. |
| Additional information | Exact working dilution needs to be determined by end user |

Application information

| | |
|-----------------------------|---|
| Recommended dilution | 1 : 1000 (WB) |
| Confirmed reactivity | Native and denaturated Cyan Fluorescent protein (CFP) and its variants: Enhanced Green Fluorescent Protein (EGFP), Yellow Fluorescent Protein (YFP) |
| Not reactive in | No confirmed exceptions from predicted reactivity are currently known |
