Product no AS14 2767

Deg8 | protease Do-like 8 (chloroplastic)

Product information

Immunogen Recombinant mature Deg8 of Arabidopsis thaliana UniProt: Q9LU10, TAIR: AT5G39830, overexpressed in E.coli

Host Rabbit

Clonality Polyclonal

Purity Serum

Format Lyophilized

Quantity 50 μl

Reconstitution For reconstitution add 50 μl of sterile water

Storage Store lyophilized/reconstituted at -20 °C; once reconstituted make aliquots to avoid repeated freeze-thaw cycles. Please remember to spin the tubes briefly prior to opening them to avoid any losses that might occur from material adhering to

the cap or sides of the tube.

Application information

Recommended dilution 1:1000 (WB)

Expected | apparent

47 | 38 kDa

Confirmed reactivity | Arabidopsis thaliana, Nicotiana tabacum

Predicted reactivity Brassica pekinensis, Glycine max, Phaseolus vulgaris, Populus balsamifera, Ricinus communis, Solanum

lycopersicum, Vitis vinifera

Species of your interest not listed? Contact us

Not reactive in No confirmed exceptions from predicted reactivity are currently known

Additional information Primary antibody can be also incubated using 1 hour at RT protocol

application example

Total protein from *Arabidopsis thaliana* was extracted with buffer containing 0.2M tris-HCl pH 6.8, 10% Glycerol, 8% SDS, 20% -mercaptoethanol, 5M Urea. 10 µg of chlorophyll were separated on 12% SDS-PAGE using tank transfer and blotted 1.5h to NC. Blots were blocked with 5% nonfat dry milk in TBS-T for 1h at room temperature (RT) with agitation. Blot was incubated in the primary antibody at a dilution of 1:1000 in 5% nonfat dry milk in TBS-T over night at 40C with agitation. The antibody solution was decanted and the blot was rinsed briefly once, then washed once for 5 min and 2 times for 15 min in TBS-T at RT with agitation. Blot was incubated in secondary antibody (anti-rabbit IgG horse radish peroxidase conjugated from Sigma) diluted to 1:10000 in 5% nonfat dry milk in TBS-T for 1h at RT with agitation. The blot was washed as above and developed for 2 min with ECL according to the manufacturer instructions. Exposure time was 1 minute.
