

Product no **AS15 2894****GAPC1/2 | Glyceraldehyde-3-phosphate dehydrogenase (cytosolic)****Product information**

<b>Immunogen</b>	KLH-conjugated synthetic peptide derived from <i>Arabidopsis thaliana</i> GAPC1 and GAPC2 proteins, UniProt: <a href="#">P25858</a> , <a href="#">Q9FX54</a>
<b>Host</b>	Rabbit
<b>Clonality</b>	Polyclonal
<b>Purity</b>	Immunogen affinity purified serum in PBS pH 7.4.
<b>Format</b>	Lyophilized
<b>Quantity</b>	50 µg
<b>Reconstitution</b>	For reconstitution add 50 µl of sterile water
<b>Storage</b>	Store at 4°C; make aliquots to avoid working with a stock. Please remember to spin the tubes briefly prior to opening them to avoid any losses that might occur from material adhering to the cap or sides of the tube.

**Application information**

<b>Recommended dilution</b>	1 : 1000 (WB)
<b>Expected   apparent MW</b>	37 kDa
<b>Confirmed reactivity</b>	<i>Arabidopsis thaliana</i> , <i>Synechocystis</i> sp. PCC 6803
<b>Predicted reactivity</b>	<i>Anthurium amnicola</i> , <i>Andrographis paniculata</i> , <i>Arachis ipaensis</i> , <i>Beta vulgaris</i> , <i>Brassica napus</i> , <i>Brassica olerace</i> , <i>Cajanus caja</i> , <i>Camelina sativa</i> , <i>Capsella rubella</i> , <i>Capsicum annuum</i> , <i>Carthamus tinctorius</i> , <i>Chlamydomonas reinhardtii</i> , <i>Cucumis sativus</i> , <i>Daucus carota</i> , <i>Elettaria cardamomum</i> , <i>Eleutherococcus senticosus</i> , <i>Eucalyptus grandis</i> , <i>Glycine max</i> , <i>Gymnadenia conopsea</i> , <i>Hordeum vulgare</i> , <i>Jatropha curcas</i> , <i>Mangifera indica</i> , <i>Malus domestica</i> , <i>Manihot esculenta</i> , <i>Medicago truncatula</i> , <i>Mikania micrantha</i> , <i>Nicotiana benthamiana</i> , <i>Oryza sativa</i> , <i>Phaseolus vulgaris</i> , <i>Prunus persica</i> , <i>Raphanus sativus</i> , <i>Rosmarinus officinalis</i> , <i>Salvia officinalis</i> , <i>Solanum lycopersicum</i> , <i>Solanum tuberosum</i> , <i>Spinacia oleracea</i> , <i>Tamarix hispida</i> , <i>Tarenaya hassleriana</i> , <i>Theobroma cacao</i> , <i>Triticum monococcum</i> , <i>Triticum aestivum</i> , <i>Ulmus pumila</i> , <i>Vaccinium uliginosum</i> , <i>Vigna radiata</i> , <i>Vitis vinifera</i> , <i>Zostera marina</i> Species of your interest not listed? <a href="#">Contact us</a>
<b>Not reactive in</b>	No confirmed exceptions from predicted reactivity are currently known
<b>Additional information</b>	Use of this antibody as a loading control should be supported with specific experimental data

**Application examples****Samples:**

- 1 – *Synechocystis* sp. PCC 6803 wild type, 10 µg total protein extract
- 2 – *Synechocystis* cp12 mutant, 10 µg total protein extract
- 3 – *Synechocystis* gap1 mutant, 10 µg total protein extract
- 4 – *Arabidopsis thaliana* wildtype, 10 µg whole leaf extract

10 µg of total protein extracted freshly from *Synechocystis* sp. PCC 6803 with 1x PBS. Buffer components: 137 mM NaCl, 10 mM Na<sub>2</sub>HPO<sub>4</sub>·2H<sub>2</sub>O, 2 mM KH<sub>2</sub>PO<sub>4</sub>, 2,7 mM KCl, pH 7.4. 10 µg of whole leaf extract extracted from *Arabidopsis thaliana*. Extraction buffer components: 50 mM HEPES, 10 mM NaCl, 5mM MgCl<sub>2</sub>·6H<sub>2</sub>O, 100 mM Sorbitol, pH 7.6. Denatured at 95°C for 5 minutes with 3x Laemmli buffer, components: 150mM Tris-HCl (pH 6.8), 300 mM DTT, 6% SDS, 0.3% bromophenol blue, 30% glycerol. Samples were separated on 12% SDS-PAGE and blotted 90 minutes to PVDF membrane, using semi-dry transfer. Blot was blocked with 5% milk in 1xTBS for 1h at RT with agitation. Blot was incubated in the primary antibody at a dilution of 1:1000 with agitation in 1xTBS overnight at 4°C. The antibody solution was decanted, and the blot was rinsed twice, then washed 4 times for 10 minutes in 1xTBS at RT with agitation. Blot was incubated in matching secondary antibody (anti-rabbit IgG horse radish peroxidase conjugated) diluted to 1:10 000 in 5% milk in 1xTBS for 2h/RT with agitation. The blot was washed as above and developed with **AgriseraECLBright** chemiluminescent solution. Exposure time was 10 seconds.

40 µg total proteins from *Arabidopsis* wt, and GAPC1-6xFlag, *gapc1-1*, *gapc1-1/gapc2-1*, and *gapc1-1/gapc2-2* mutants, extracted and denatured as described by [Larkin \(2007\)](#), were separated on 12% SDS-PAGE and blotted 1h to PVDF using tank transfer. Blots were blocked with TBS-T buffer with 5% skimmed milk for 1h at room temperature (RT) with agitation. Blot was incubated in the primary antibody at a dilution of 1: 1000 for overnight at 4°C with agitation in TBS-T with 2% skimmed milk. The antibody solution was decanted and the blot was rinsed briefly twice, then washed once for 15 min and 3 times for 5 min in TBS-T at RT with agitation. Blot was incubated in secondary antibody (Goat anti-rabbit IgG horse radish peroxidase conjugated, from ZSGB-BIO, China) diluted to 1:0000 in for 1h at RT with agitation. The blot was washed as above and developed for 1 min with EasySee Western Blot Kit (TRANS™, China). Exposure time was 30 seconds.

50 µg of total protein from *Arabidopsis thaliana* extracted with buffer containing 50 mM Tris-HCl pH 7.5, 150 mM NaCl, 10 mM MgCl<sub>2</sub>, 5 mM EDTA, 10% glycerol, 0.1% NP-40, 0.1% protease inhibitor cocktail, and denatured by boiling for 5 min. The total proteins were separated on 10% SDS-PAGE and blotted 1h to PVDF using tank transfer. Blots were blocked with for 1 h at room temperature (RT) with agitation. Blot was incubated in the primary antibody at a dilution of 1: 10000 for 12 h at 4°C in TBST containing 5% non-fat dry milk. The antibody solution was decanted and the blot was rinsed three times for 10 min each in TBST with agitation. Blot was incubated in secondary antibody (anti-rabbit IgG horse radish peroxidase or alkaline phosphatase conjugated) diluted to 1:10 000 in for 2 h at RT with agitation. The blot was washed as above and developed for 2 min with chemiluminescent detection reagent in extreme low femtogram range. Exposure time was 30 seconds. For alkaline phosphatase, the blot was stained with buffer (100 mM Tris pH9.5; 100 mM NaCl; 5 mM MgCl<sub>2</sub>) containing BCIP ((GoldBio) and NBT (Fischer Scientific).
