Product no AS05 082

Lhca5 | PSI type V chlorophyll a/b-binding protein

Product information

Immunogen	BSA-conjugated synthetic peptide derived from the Lhca5 protein of <i>Arabidopsis thaliana</i> (At1g45474). This sequence is highly conserved in Lhca5 proteins of angiosperms (monocots and dicots) and gymnosperms. UniProt: Q9C639 . TAIR: At1g45474
Host	Rabbit
Clonality	Polyclonal
Purity	Total IgG. Protein G purified in PBS pH 7.4.
Format	Lyophilized
Quantity	1 mg
Reconstitution	For reconstitution add 200 µl of sterile water
Storage	Store lyophilized/reconstituted at -20°C; once reconstituted make aliquots to avoid repeated freeze-thaw cycles. Please remember to spin the tubes briefly prior to opening them to avoid any losses that might occur from material adhering to the cap or sides of the tube.
Additional information	More information on the Lhca5 localization within the LHCI antenna can be found in Lucinski et al. (2006) Lhca5 interaction with plant photosystem I. FEBS Letters 580:6485-6488

Application information

Recommended dilution	1 : 1000-1 : 3000 (WB)
Expected apparent MW	27.8 23 for <i>Arabidopsis thaliana</i>
Confirmed reactivity	<i>Arabidopsis thaliana</i> , <i>Bryopsis corticulans</i> , <i>Hordeum vulgare</i> , <i>Spinacia oleracea</i>
Not reactive in	<i>Chlamydomonas reinhardtii</i> , <i>Physcomitrella patens</i>
Additional information	Protein is processed into mature form (Jansson 1999). Urea is not recommended to use in extraction buffer and in a gel, when working with this antibody.
