Product no AS09 522

Lhcb1 | LHCII type I chlorophyll a/b-binding protein (Arabidopsis specific)

Product information

Immunogen	BSA-conjugated synthetic peptide derived from <i>Arabidopsis thaliana</i> At1g29910 (Lhcb1.1), At1g29920 (Lhcb1.2), At1g29930 (Lhcb1.3, most expressed), At2g34430 (Lhcb1.4), and At2g34420 (Lhcb1.5)
Host	Rabbit
Clonality	Polyclonal
Purity	Immunogen affinity purified serum in PBS pH 7.4.
Format	Lyophilized
Quantity	100 µg
Reconstitution	For reconstitution add 100 µl of sterile water
Storage	Store lyophilized/reconstituted at -20°C; once reconstituted make aliquots to avoid repeated freeze-thaw cycles. Please remember to spin the tubes briefly prior to opening them to avoid any losses that might occur from material adhering to the cap or sides of the tube.
Additional information	A molecular characterisation of the LHCII proteins can be found in Caffari et al. (2004) A Look within LHCII: Differential Analysis of the Lhcb1–3 Complexes Building the Major Trimeric Antenna Complex of Higher-Plant Photosynthesis. Biochemistry 43 (29): 9467–9476

Application information

Recommended dilution	1 : 2500-1 : 5000 (WB)
Expected apparent MW	28 25 kDa (<i>Arabidopsis thaliana</i>)
Confirmed reactivity	<i>Arabidopsis thaliana</i> , <i>Digitaria sanguinalis</i> , <i>Echinochloa crus-galli</i> , <i>Pinus strobus L.</i>
Predicted reactivity	Algae, Dicots, Mosses Species of your interest not listed? Contact us
Not reactive in	No confirmed exceptions from predicted reactivity are currently known
Additional information	This Lhcb1 antibody is directed specifically against the <i>Arabidopsis</i> Lhcb1 gene products, for those that would prefer higher specific activity over broader specificity offered by Agrisera older Lhcb1 antibody, AS01 004 Protein is processed into mature form (Jansson 1999).
