

Product no **AS06 128****LOX | Lipoxygenase****Product information**

<b>Immunogen</b>	native lipoxygenase, type I-B, purified from <i>Glycine max</i> (Sigma, product number <u>L7395</u> ) UniProt: <u>P08170</u>
<b>Host</b>	Rabbit
<b>Clonality</b>	Polyclonal
<b>Purity</b>	Serum
<b>Format</b>	Lyophilized
<b>Quantity</b>	50 µl
<b>Reconstitution</b>	For reconstitution add 50 µl of sterile water
<b>Storage</b>	Store lyophilized/reconstituted at -20°C; once reconstituted make aliquots to avoid repeated freeze-thaw cycles. Please remember to spin the tubes briefly prior to opening them to avoid any losses that might occur from material adhering to the cap or sides of the tube.

**Application information**

<b>Recommended dilution</b>	1 : 1000 (WB)
<b>Expected   apparent MW</b>	54 (subunit), 108 (native enzyme)
<b>Confirmed reactivity</b>	<i>Arabidopsis thaliana</i> , <i>Glycine max</i> , <i>Lilium longiflorum</i> , <i>Lupinus luteus</i> , <i>Musa acuminata</i> , <i>Musa paradisiaca L.</i> , <i>Nicotiana benthamiana</i> , <i>Olea europaea</i> , <i>Oryza sativa</i>
<b>Predicted reactivity</b>	<i>Glycine max</i> , <i>Lathyrus undulatus</i> , <i>Malus x domestica</i> , <i>Solanum tuberosum</i> , <i>Vicia faba</i>
	Species of your interest not listed? <a href="#">Contact us</a>
<b>Not reactive in</b>	<i>Chlamydomonas reinhardtii</i>

**Application example**

Samples of *Arabidopsis thaliana* (2), *Olea europaea* (3), *Lilium Longiflorum* (4), *Lupinus luteus* (5) were ground in liquid nitrogen to a very fine powder using a mortar and pestle and resuspended in 1.5 ml of extraction buffer (4% SDS, 2% 2-mercaptoethanol, 2 mM PMSF, 100 mM Tris-HCl pH 8.5). The samples were incubated for 3 min at 80°C. Protein suspensions were clarified by centrifugation at 13,500 g for 10 min at room temperature and the resulting supernatants were used. Total proteins (25 µg per sample) were separated by SDS-PAGE on CriterionTMTGX™ Precast Gel (Bio-Rad, USA) using Criterion™ Cell apparatus (Bio-Rad). Proteins were electroblotted onto a PVDF membrane using Trans-Blot® Turbo™ Transfer Pack (Bio-Rad) in a Trans-Blot® Turbo™ Transfer System (Bio-Rad). The membrane was blocked for 1 h in solution containing 1 % (w/v) non-fat dry milk in TRIS-buffered saline (TBS) buffer, pH 7.4. The membrane was incubated in the

This product is **for research use only** (not for diagnostic or therapeutic use)

primary antibody at a dilution of 1 : 1000 in TBS buffer containing 1 % (w/v) non-fat dry milk over night at 4°C with agitation. A DyLight 488 conjugated anti-rabbit IgG ([AS10 831](#), Agrisera), diluted 1:2000 in TBS buffer for 2 h, served as the secondary antibody. The signal was detected in a Pharos FX molecular imager (Bio-Rad). Line 1 contains LOX protein from Sigma.
